PATTERNIST ELEMENT SPAWN LOCATION PROPOSAL

Below is a potential array of locations along the navigable route between the two Impakt Festival venues, the Het Huis and Foundation Fotodok. We have adapted our seven infrastructural categories, where elements spawn, to relate to the Algorithmic Superstructure theme. By playing Patternist, participants reveal connections between patterns of discrete urban systems, old and new, coexisting within interconnected intelligent networks.

- *Some locations will require further research on ground/Google to verify GPS coordinates and relevance
- **We will continue to update this collaborative Map on Google MyMaps <<**LINK>>**

PATTERNIST ELEMENT SPAWN LOCATION TYPES

tdtegdry	Influence	Capitalism	Surveilance	Standardization	Journalism	Water	Wifi
laction	Advertising billboards, marquees, branding	Banks, currency conversion booths, crypto-cafes	CCTV, security guards, security gates	Street tiles, modular facades, mass production	Newspaper magazine media retailers	River, canal, fountain, pipe, drain	Power outlets, wifi, fiberoptic cables, radio towers
dispitituitus supetituitus	ana capitalism	Capital acquisition and management , national and international currency	Analogue enabler of access and prohibition, control, record, archive	Assembly line, analogue superstructure, universality, generic replication	Analogue access to media, official publications, universal headlines	Semi-visible utility network, historical physical superstructure logistic system	Invisible networks, digital connectivity, planned systems
